Summary

Operations professional with proven experience managing end-to-end program execution in the EdTech and higher-education sector. Led cross-functional coordination across Product, Engineering, and Operations teams to deliver the National Scaler Entrance Test (NSET), achieving a 97.54% process completion rate. Experienced in stakeholder management, process improvement, funnel analysis, and data-driven decision-making, with measurable results including 15–20% improvement in interview-stage completion and 20% gain in operational efficiency through process automation initiatives. Proficient in SQL, Python, and Google Sheets for dashboard reporting, metrics tracking, and performance analysis. Skilled in Agile methodology, PRD documentation, UAT, and requirement gathering. Seeking a Program Operations role to apply strong analytical, coordination, and process-optimization skills in a fast-paced environment.

Skills

Program & Operations Management: Program Execution, End-to-End Process Ownership, Cross-Functional Coordination, Stakeholder Management, SOP Documentation, Process Optimization, Root Cause Analysis, Workflow Standardization, KPI Management, OKRs, Agile Methodology, Sprint Planning, Backlog Management
Data Analysis & Reporting: SQL, Python, Funnel Analysis, Dashboard Reporting, Metrics Tracking, Data-Driven Decision Making, Google Sheets, Metabase, Excel
Product & Requirements: PRD Writing, User Stories, Business Requirement Gathering, UAT (User Acceptance Testing), Feature Specification, Edge-Case Identification, Process-Flow Documentation
Tools & Platforms: Google Workspace, Excel, PowerPoint, Metabase, Analytics & Dashboard Tools, Git
Core Competencies: Operations Strategy, Business Excellence, Customer/Candidate Experience, Team Collaboration, Communication (Written & Verbal), Problem Solving

Work Experience

Program operations Intern, *Interviewbit Software Services Pvt. Ltd. (Scaler)* 12/2025 – 08/2026
- Owned end-to-end execution of the National Scaler Entrance Test (NSET), coordinating across Product, Engineering, and Operations to improve candidate experience and achieve a record 97.54% process completion rate.
- Supported Product Managers on internal platforms including Drona (Interview Platform) and Companion Mode — gathering requirements, writing specs, and validating feature behavior through sprint cycles, UAT, and edge-case testing.
- Analyzed user journeys, funnel drop-offs, and engagement metrics using SQL and Google Sheets, building dashboards and reports that powered weekly product reviews and data-driven prioritization.
- Partnered with Product Managers and Engineers to identify friction points across the admissions journey, improving interview-stage completion by 15–20% through iterative experimentation and feedback analysis.
- Authored PRDs, user stories, and process-flow documentation; drove Agile sprint planning and backlog management while researching AI-driven automation (including AI-powered interview evaluation), contributing to a ~20% gain in operational efficiency.

Projects and Research Papers

ApexForge, *Python, Neo4j, LangChain, Tesseract OCR, spaCy, Streamlit*
- Developed an AI-powered forensic auditing platform integrating OCR, NLP, and Neo4j graph analytics to automate financial fraud detection and reconstruct complex multi-hop transaction flows.
- Deployed a multi-agent LLM reasoning system (LangChain) achieving 90.2% anomaly detection F1-score using an ensemble of Isolation Forest, LOF, and GNN models.
- Reduced forensic investigation time by 80% over manual methods with 97.3% OCR accuracy and 94.1% NLP entity extraction F1-score.
- Implemented a SHA-256 cryptographic reasoning ledger ensuring tamper-proof, legally compliant, and court-admissible audit outputs.

Blinklytics
- Built an interactive Power BI dashboard analyzing Blinkit sales data, surfacing trends, top-performing products, and regional performance metrics.
- Queried and transformed raw sales data using PostgreSQL to deliver structured, stakeholder-ready insights.
- Translated complex datasets into actionable business intelligence, supporting data-backed decision-making across operations.

AI in Supply Chain Management: Enhancing Efficiency, *Published in IJCRT (ISSN: 2320-2882)*
Analyzed operational data across 6+ units to identify inefficiencies, improving forecast accuracy by 18% and reducing delays by 22%. Translated insights into actionable recommendations supported by KPI dashboards.

Education

Master of Computer Application in AI/ML, *Jain (Deemed-to-be University)* 08/2024 – 06/2026 | Bangalore
CGPA: 7.8

Bachelor of Computer Application, *Maharaja Ganga Singh University* 08/2021 – 05/2024 | Bikaner
CGPA: 7.3

Certifications

HACKATHON
Oneearth International

AWS Fundamentals
Amazon

Application Of Al For Anomaly Detection
NVIDIA
